## MC20 MASTER

MASTER OF SPEED

The MC20 is the Maserati super sports car that pushes the boundaries of time. With its awesome 630 HP 3-litre Nettuno twin-turbo V6, the figures speak for themselves: 0-100 kph in 2.9 seconds and top speed of 325 kph. Only on a racetrack can this performance be truly appreciated and only with the expertise of professional drivers can its dynamic qualities be properly revealed. This is why the MC Master course has been created.

During the advanced racetrack sessions, drivers learn how to optimise the MC20 in all driving modes: GT, SPORT and RACE, both with and without the electronic aids.

Each car is equipped with a sophisticated onboard video recording device, matched to a racing-style data acquisition system that measures all main driving parameters.

The six Maserati MC20s in use have been updated for maximum dynamic performance and feature carbo-ceramic brakes, forged alloy wheels, an electronic limited slip differential and lightweight carbon seats.
