THE EVOLUTION OF SPEED

The SPORT course is the most advanced one-day driving experience with the fastest models in the Maserati range: the Ghibli Trofeo, Levante Trofeo and the stunning new MC20 (SPORT and RACE driving modes only)

Your personal instructor will always be by your side, along with a team of telemetry experts to analyse your data.

You will also seat behind the wheel of the GranTurismo MC GT4, a real race car homologated for the GT4 class championships; slick tires, racing brakes, a powerful V8 4,7 liters engine and the amazing sound of the racing exhaust will boost your adrenaline in two exciting track sessions.

Two more challenges complete the training program: the driving ability contest along a technical and tight layout and the drag racing contest along the main straight of the circuit.

At the end of the day, the best drivers will receive awards during the closing ceremony.

PROGRAM

- 8.45am** Welcome to the track and registration of participants.
Dedicated SPORT theory session focused on:
- Driving seat position and correct use of the car's controls
 - Racing lines
 - Braking procedures
 - Visual targeting
 - Racing techniques
- 9.30am** Start of dynamic activities: warm up sessions
Demonstration lap with a professional driver, followed by the first driving session for participants to familiarize themselves with the circuit: braking zones, racing lines through corners, points of acceleration out of bends.
- 10.30am** Split of participants in groups. To minimize waiting time, activities take place on a rotational basis.
Two driving sessions on the track; in the second session, data is collected for the Telemetry Race Contest via a professional onboard data acquisition system that monitors the driver's performance in terms of steering angles, braking pressure, lap times and racing lines. These will go towards the final ranking, which will be determined by the participant's overall driving technique and expertise.
One driving session with the 'Follow My Leader' principle: alone in their designated Maserati, each participant has to follow their instructor who is driving the car in front. Connected by radio, their task is to copy the racing lines, acceleration and braking points, and try to keep up with their instructor.
Competitive contest to score the best lap time on a tight track layout designed in the paddock skid area. The characteristics of the track will reward the driving skills and precision of the best drivers.
Two driving sessions onboard the sensational MC20
- Session 1: Focus on the MC20's performance and handling capabilities in SPORT mode
- Session 2: Explore the car's performance and handling in RACE mode
Two driving sessions onboard the GranTurismo MC GT4, a real racing car homologated for GT championships, with slick tires and full race setup. A truly emotional experience for all sport drivers.
- 1.30pm** Buffet lunch at the circuit restaurant
- 2.30pm** Dynamic activities resume
- 4.45pm** Drag Race
Participants compete in an acceleration challenge in MC20s along the main straight. Each driver has two runs. The times are monitored by a professional timing system, which also measures the driver's split-second reactions when the lights go green.
- 5.30pm** End of dynamic activities
Farewell, certificates and awards ceremony for the best drivers of the day.

We look forward to seeing you at the track:
Autodromo Riccardo Paletti, Strada per Fosio, 1 43040 Varano de' Melegari (PR), Italy.
