VIDEO HEALTH CHECK

Always ready to give you the best.

We care about your car as much as you do. That's why we designed Maserati Video Health Check, the new digital tool that helps you monitor the entire service experience of your Maserati, comfortably from wherever you are.

What is Maserati Video Health Check?

Maserati Video Health Check is a new and transparent program that allows us to communicate with you when your car is being serviced. Thanks to this new digital feature, our expertly trained technicians will keep you up to date while your car is undergoing service, and they will share with you any additional maintenance work that may arise. You will get the video directly on your preferred device and your approval will be just a click away.

Transparency and reliability.

We firmly believe that transparency and reliability are essential in any relationship of trust.

For this reason, we want you to be actively involved in the entire assistance service process, step by step. You will be therefore informed about any potential occurrence that requires additional intervention.

Everything under control.

Knowledge is power. It is what makes you feel free and safe to go anywhere. Maserati Video Health Check provides you with a constant and complete overview of the status of your vehicle, to guarantee you have a clear insight into every necessary intervention. By doing so, you will always be able to enjoy maximum comfort and security behind the wheel of your Maserati.

Great flexibility, total freedom.

Maserati Video Health Check elevates your service experience and conveys the passion we put into taking care of your car. We are deeply convinced that transparency is the key: that's why our experts are eager to share with you everything they see, so that you can decide whether, and how, to proceed.

Check the availability of the service with your trusted Maserati Dealer.
