

GT2 Racetrack Academy

Speed at its most extreme

The Maserati GT2 Stradale delivers unparalleled sensations and superior performance: these are the ingredients of the Racetrack Academy. The goal is to achieve the highest knowledges of the racetrack driving by means of intensive track sessions on board of the MC20 and the GT2 Stradale. The playground is the circuit of Vallelunga, FIA homologated circuit featuring a very technical layout, with 10 different turns along 4,085 km.

The team of professional drivers guarantee a continuous support throughout the dynamic program, focusing on key aspects such as the warm up of semi-slick tyres, the performance braking, the transition phase to the acceleration, the load transfers and more. The Lead & Follow sessions, where the driver is left alone in the car to follow his instructor on track, complete the advanced training program. A professional on-board telemetry data acquisition system will record all main driving parameters, for a deep analysis with the instructor. After the sim-racing contest with a Maserati GT2 Racer on a professional simulator, the hot lap session on board of a real GT2 Racer sets the peak of the experience and emotional engagement.

MASTER MASERATI
DRIVING EXPERIENCE

GT2 Racetrack Academy

Speed at its most extreme
