SIDE PROTECTIVE FILMS
On a high-performance vehicle, the sides of the bodywork are vulnerable to scratches and dulling from gravel. The Side Protective Film allows you to enjoy an exhilarating drive without hesitation, knowing that your paintwork is shielded from damage. Created from the same urethane layer as the Protective Film for the Loading Edge, it is virtually invisible and will remain so over time. The film is applied using a water-based adhesive solution, which can be removed without leaving any residue.

PROTECTIVE FILM FOR THE LOADING EDGE
Heavy suitcases can be loaded without worry thanks to the Protective Film applied to the rear bumper’s loading edge. Made from a moulded urethane layer, it provides reassuring protection for your bodywork. It will remain perfectly transparent over your Maserati paintwork and, if necessary, can be peeled off without a trace.
